

# Churches

LP

I can't believe in churches so I guess I'll keep on searching  
I don't want someone that doesn't want me back  
I'm not looking for perfection, I prefer to keep 'em guessing  
When the end comes, we'll find out who's keeping track

I was walking through a city present day and feeling free  
When I stepped into a chapel just to see  
When a woman has to hide their head from God to get a seat  
In any holy place, that's not the place for me

My church is you  
My church is love  
My church includes all of the above  
No questions asked  
No one to judge  
My church is you  
And always was  
My church is love

When I see a big cathedral, I just think of all the people  
Who have suffered in the name of saints and gods  
I'm so lucky to be living in a time that's more forgiving  
But I know that I have barely beat the odds

My church is you  
My church is love  
My church includes all of the above  
No questions asked  
No one to judge  
My church is you  
And always was  
My church is love

(We'll never know until we go  
We'll never know until we go  
We'll save our souls  
We're not alone  
We'll save ourselves)

My church is you  
My church is love  
My church includes all of the above  
No questions asked  
No one to judge  
My church is you  
And always was  
My church is love

My church is love  
My church is love  
My church is love  
My church is love
