

Little Death

LP

Can you come for me when I get down
Can you catch me when I hit the ground
We're connected baby
We're the same
Did you feel that, baby?
I just came

Can't be near you without there being fire
Can't be near you without there being fire

Girl you know what makes me go like hell
My mouth just waters when I hear the bell
I'm a dog for you but I move like a cat
I can't help it when you look like that

Can't be near you without there being fire
Can't be near you without there being fire

I know where you're coming from
You only really want it once and you're gone
You know that you are

Don't look down we're way too high
I'm the only one who makes you fly
Because you're mine

Can't be near you without there being fire
Can't be near you without there being fire
