Too Much

LP

Ooh... everything I want
You have been all along
But ooh... it's too much, I'm falling

I still think about you every day
Maybe two or three times, when I get carried away
I could never push rewind and erase
But at least I know now that it wasn't a phase

You're everything I want
And you have been all along
But ooh... it's too much

Too much... too much will never be enough
Whenever we touch, it happens every time
I have to turn around and run

Hold me closer and I'll try to forget
If I take it too far, I will always regret
Hurting someone who will never suspect
Who isn't even aware that you could be such a threat

You're everything I want
And you have been all along
But ooh... it's too much

Too much... too much will never be enough
Whenever we touch, it happens every time
I have to turn around and run
Girl I can't take your love
I can't look back, I'll turn to dust
Baby I wish that I could have it all
But I don't, it's just too much

Ooh... too much
Is it going to be over
It's never over... too much

Too much will never be enough
Whenever we touch, it happens every time
I have to turn around and run
Your love... I can't look back, I'll turn to dust
Baby I wish that I could have it all
But I don't, it's just too much

Too much... too much will never be enough
Whenever we touch, it happens every time
I have to turn around and run...
