

Yes

LP

I've been here waiting for you
These LA nights destroy you
Might never get to know you
But I'll be here waiting for you

Oh, I can see the lights
Yeah, oh, when I couldn't see the light, yeah

I see the perfect storm and
I'm holding pretty strong but
Even if it all goes wrong, yeah, oh
I'll be right here
Oh, I feel you and I'm right here

Help me darling, don't let go
Climb that ladder, don't say no

Say yes
To feeling things that you don't know yet
Say yes
The more you live, the more you get
I was just about to leave when it all went down
And you changed my life and it turned around
Simple shit, like you're lost then found
When all I said was yes

So far to go but I feel like
We're so, so close, I know it
I know you got this now
But oh, I feel right here
Oh, I feel you and I'm right here, yeah

Help me darling, don't let go
Climb that ladder, don't say no

Say yes
To feeling things that you don't know yet
Say yes
The more you live, the more you get
I was just about to leave when it all went down
And you changed my life and it turned around
Simple shit, like you're lost then found
When all I said was yes
