

Uncertainty Principle

L'Rain

All holes aren't zeros
'Yes' is always 'Maybe'
Silence is an answer for all but you

One and one is two for no one at all but you
Physics' father knows all of life is grey

Nine hundred twelve
Days passed since those
Binary years
Those dying years

It's a new day and I will believe in something
Maybe someday we will all believe in something
You're convinced that in the dark there will be nothing
But to me, a little nothing's got some something
It's a new day and I will believe in something
Maybe someday we will all believe in something
You're convinced that in the dark there will be nothing
But to me, a little nothing's got some something
