

April Love

L.T.D.

I remember you
And the first time we looked in each other's eyes
I felt a warm surprise
I knew right then and there
You were, hungered only for me

The beginning of spring, the nature sings
The blossoming everywhere
To have the special love in my life
Hungered only for me

My April love
My April love
I never knew the joy from love could delight me so
Just to know I have someone so close that really loves me
My April love
You're the special love of my life
My April love
Hungered only for me
My April love
Ooh yeah
My April love

When the time of year is near
I always get that same old feeling all over again
Everything's feeling brand new
Just like the very first time

The beginning of spring, the nature sings
The blossoming everywhere
To have the special love in my life
Hungered only for me

My April love
My April love
I never knew the joy from love could delight me so
Just to know I have someone so close that loves me
My April love
You're that special love in my life
My April love
Hungered only for me
My April love

You're that special someone in my life
My April love, oh, oh
You're that special someone in my life
My April love
You hungered only for me
My April love, April love
You're my April love
My April love
Hungered only for me
Yeah, what would I do without you, baby?
