

# Clothes I Slept In

Luca Brasi

I think I went crazy trying to stay sane  
Trying to keep my head out of the grave  
I never thought to expect  
More than manic bliss  
I think I lost it  
Stuck at the big end of the bottle  
Where all I mean to say  
It all goes down with the dregs  
Lost in the swirling haze

I think I went crazy trying to remain  
Trying to make some sense of the mess in my brain  
Fingers crossed that this  
Is the worst that my head is going to get  
Of everything I thought I'd need  
In this desperate waking dream  
Is standing right in front of me

You're just standing there like heaven  
While I'm still wearing the clothes I slept in  
Telling myself just keep on breathing  
It's your spirit that I'm seeing  
And it's burning bright and clear  
Burning bright and clear

I've never felt a time  
Where everything I am  
Felt less defined  
Just trying to find the safest place to land  
When every single thing I need  
A vision and a dream  
Is standing right in front of me  
Right in front of me

You're just standing there like heaven  
While I'm still wearing the clothes I slept in  
Telling myself just keep on breathing  
It's your spirit that I'm seeing  
And it's burning bright and clear  
Burning bright and clear

Relying on your easy glow  
To pull me up from the undertow  
The faces that we show  
So far from our own

You're just standing there like  
You're just standing there like  
You're just standing there like

You're just standing there like heaven  
While I'm still wearing the clothes I slept in  
Telling myself just keep on breathing  
It's your spirit that I'm seeing  
And it's burning bright and  
Burning bright and  
Burning bright and clear
