

## Led Astray

Luca Brasi

I was just nodding off  
Sky high and adrift  
While you were just knocking off  
A shit afternoon shift  
I spent the whole goddamn day  
In the worst seat of the goddamn van  
Running it through my head  
How many times can I do this again?

But, hey!  
It won't always feel this way  
But the world is one beautiful place  
It won't always drag me away  
But the world is one mess of a place

You were just clocking off  
While I was just waking up  
We're on different pages today  
Sometimes things don't link up  
You led the whole goddamn way  
Scared to let go of your hand  
In case I get lead astray  
The world's a big place  
And my heels won't dig in

But, hey!  
It won't always feel this way  
But the world is one beautiful place  
It won't always drag me away  
But the world is one mess of a place

There's something to be said  
For loving something that's already dead  
It's already, already dead

At least we know what's at stake  
At least you know I'm a fake  
At least you know I never thought much anyway  
Never thought much anyway
