

Crystal Blue

Lucero

I see your eyes clear in my head
I loved the girl I barely met
Crystal blue dream come true
In slow motion you just walk on by
Remembering now, remember how
You looked at me across the room that night
Were strangers still despite my will

You don't need her name with a smile so sweet
Your eyes cut deeper into me
Crystal blue dream come true
In slow motion you just walk on by
Remembering now, remember how
You looked at me across the room that night
Were strangers still despite my will

Hell I won't be gone to long
Well I'm never coming back
All it takes is saying so long
Well it always comes to that
It's just one smile
It's just one smile
It's all for you
It's all for you
I see you eyes clear in my head
I loved the girl I barely met
Crystal blue saw right through
In slow motion you just walked on by
