

Hallways

Lucius

I will buy you flowers and put 'em in a crown
You rule my world, you make it melt
You make the songs out of the sounds
And every time I lose my mind, you never ask it to be found
You let it roam, you let it cry, you always let me come around
I'll always come around

I will put the work in, give it everything I've got
'Cause what we have is perfect, even when it's not
Like when I try to prove I'm right, you let me talk my way back out
You let it go, you let it die, you always let me come around
I'll come around

I can't see the ending from the start
Scared of what is swimming in the dark
I'm running through the hallways
And I never find the right room
But then I wake up and you're right there
All I was looking for was you, you, you, you

I will make my mind up, and change it every hour
I'm still trying to figure out if I'm a weed or I'm a flower
And you just kinda laugh it off and wait around to see it bloom
You say I'm a garden, that I'm more than just the two
Watch it bloom

I can't see the ending from the start
Scared of what is swimming in the dark
And I'm running through the hallways
And I never find the right room
But then I wake up and you're right there
All I was looking for was you, you, you, you
You, you
You

And I'm running through the hallways
And I never find the right room
But then I wake up and you're right there
All I was looking for was you
All I was looking for was you
Looking for was you
All I was looking for was you

I can't see the ending from the start
Scared of what is swimming in the dark
I can't see the ending from the start
