

# Sun in My Eyes

## Lucky Boys Confusion

The sun in my eyes doesn't bother me like it used to  
You could say the pain reminds me I'm alive  
The crash of the clouds, it doesn't frighten me like it used to  
You could say that rain reminds I survived

How did we go from getting so high to feeling shallow?  
Most of these days, these days we make it up as we go  
Can you look back and tell me that you still feel the same?  
'Cause we're making it up as it goes away

The weight of the world doesn't hurt my back like it used to  
You could say the pain reminds me I'm alive  
The gossip and lies, they don't shake my world like they used to  
You could say I changed, you could say I tried

How did we go from getting so high to feeling shallow?  
Most of these days, these days we make it up as we go  
Can you look back and honestly say those are better days?  
We're making it up as it goes away  
We're making it up as it goes away

I don't need no paradise  
I don't need callous points of view  
'Cause in our world there's no sacrifice  
I just make it up with you  
I will make it up to you

The sun in my eyes doesn't bother me like it used to  
You could say the pain reminds me I'm alive

How did we go from getting so high to feeling shallow?  
Most of these days, these days we make it up as we go  
Can you look back and honestly say you'll never change?  
We're making it up as it goes away  
We're making it up as it goes away  
We're making it up as it goes away  
We're making it up as it goes away
