

# I've Got You Babe

Lucky Dube

I have gone right round the world, trying to find a women  
A women that'll understand me  
A women that'll understand me  
All the women I had before, never understood me

Now that I've found you baby  
I ain't gonna look no further  
Now that I've found you baby  
I ain't gonna look no further  
Now that I've found you baby  
I ain't gonna look no further

It's so nice when you're there, so nice, so nice  
I love you I love you I love you I love you I love you

I've got you babe to make me feel alright  
I've got you babe to make me feel alright  
I've got you babe to make me feel alright  
I've got you babe to make me feel alright  
I've got you babe to make me feel alright  
I've got you babe to make me feel alright

Baby you know how much I need you baby  
Please never leave me baby, never leave me, ooh

You know baby my life depends on you  
You are my future you are everything I've got  
Please baby please baby, yeah

I've got you babe to make me feel alright  
I've got you babe to make me feel alright  
I've got you babe to make me feel alright  
I've got you babe to make me feel alright  
I've got you babe to make me feel alright  
I've got you babe to make me feel alright
