

I Can't Change It All

Lucy Rose

When you first walked in
When you took that step, you took my breath
Then you took the rest

As the days went by
With this new found man right by my side
Now here's goodbye

'Cuz it hurts when it hurts
And it kills when it kills
And the pain it won't fade
But with time you will heal

I can hear you calling me
I can hear you from across this open sea
I can hear your voice as it is calling me
Calling for somebody to help you be free
But it's not me

And the more I learned
And the more you taught, the more I found
A way goodbye

'Cuz it hurts when it hurts
And it kills when it kills
And the pain it won't fade
But with time you will heal

And it hurts when it hurts
And it kills when it kills
And the pain it won't fade
But with time you will heal

I can hear you calling me
I can hear you from across this open sea
I can hear your voice as it is calling me
Calling for somebody to help you be free
But it's not me

'Cuz I can't change it all
I can't make it right
But I could give you warmth
In the coldest nights

But I can't change it all
And I can't make it right
But I could give you warmth
In the coldest nights

I can hear you calling me
I can hear you from across this open sea
I can hear your voice as it is calling me
Calling for somebody to help you be free
But it's not me
