

Watch Over

Lucy Rose

It's a long time, heard it all before
It's a long time tell me is this what you're looking for
It's a long time, heard it all before
It's a long time tell me is this what you're looking for

I know just how it feels to be there
One step too far and it's on your mind
Your heart it falls like you do
You say that it hurts say that it hurts

I'll walk away if you follow me

We're so far from what we know could be
Lights from your house watch out over me

And we had

You let me go right from the start
Inwards you fall and it's on my mind
It was just like you asked for
You know that it was know that it was

I'll walk away if you follow me
I'll walk away if you follow me

We're so far from what we know could be
Lights from your house watch out over me

And we had
And we had

I got now you had it all

Can you feel it now it's gone
Is it what you thought it was
Can you really stop it now

It's a long time heard it all before
It's a long time tell me is this what you're looking for
It's a long time heard it all before
It's a long time tell me is this what you're looking for
It's a long time what you're looking for
It's a long time what you're looking for
It's a long time what you're looking for
It's a long time tell me is this what you're looking for
