

Never in vain

LUCY

I'm gonna fade out arrested by the night
Even shadows around me have nothing to say to you
Oh, babe, calling your name, I blind myself everyday
This memory's not sad it just makes me filled with you

And look we're against the world
And you never left me all alone
'Cause we're written in the stars
The black sky was full of scars
But you burn my darkness overnight
Our love was never in vain

I'm gonna fade out arrested by the night
Even shadows around me have nothing to say to you
Oh, babe, calling your name, I blind myself everyday
This memory's not sad it just makes me filled with you

You hit me with the FaceTime
It's hard to even say hello
Probably you felt alone, I made you insecure
You know, I'm gonna be on your side
When all of this fight's over
When you down and when we fall
You know, I won't let you go

And look we're against the world
And you never left me all alone
'Cause we're written in the stars
The black sky was full of scars
But you burn my darkness overnight
Our love was never in vain

When every part of me is ripped away
Nobody ever can stop me in any way
When every part of me is ripped away
Nobody ever can stop me back to you

Now look, we're against the world
And you never left me all alone
'Cause we're written in the stars
The black sky was full of scars
But you burn my darkness overnight
Our love was never in vain
