

Heart Closed

Luh Kel

Let's go to all states baby you in good hands
Rolling with me you got a good man
I just been... stacking my chips up like a wood damn
You play with me I wish you would damn
Right now I'm all alone to keep it real
Right now I'm all alone like in the field
Always keep my heart closed
Never know who cold so keep your heart closed
Never know who to trust so keep your heart closed

Don't trust to many keep my heart closed
Can't take my feelings out my heart inside a bottle
Love me for me not tiffany she love a bottle
Told her that I want her feelings changed soon as I got her
Baguettes, designer
I put you gucci prada
Take a flight to the islands somewhere where they can't find us
Cancun to the bahamas long as you right beside me
Just tell me what you want and I promise girl you got it
I can't let you go something bout you, you touch my soul
As soon as we get home, take clothes off you turn me on
You the only one I want you ain't gotta worry bout these hoes
Uh uh uh uh
You like it, I love it you know that it's on
Tell me the places that you wanna go
Girl it don't matter, we go to the moon
She call my phone when she feeling alone
Take off my clothes I can smell my cologne
Selfish want you on my own
Felt it when you left me alone
Tell me that you love me
But you don't wanna never let it show
Because I done got lied to before
Sometimes gotta push through you know
I understand baby I loverubber bands
Baby I can't be yo man
Let's get to it like I'm Dan

Let's go to all states baby you in good hands
Rolling with me you got a good man
I just been... stacking my chips up like a wood damn
You play with me I wish you would damn
Right now I'm all alone to keep it real
Right now I'm all alone like in the field
Always keep my heart closed
Never know who cold so keep your heart closed
Never know who to trust so keep your heart closed
