

Take It Slow

Luh Kel

Oh girl, don't tell me we doing all this love shit fight again
I know you want some loving, baby that just might depend
You playing with my mind, but I'm just tryna be your man
Lift me high up in the sky, I'm still trying not to land

And I know it, we might be different all along
Keep you close, love when you with me, you keep me strong
And I love, love when we kiss and love when you moan
Next to me, let's switch position, just take it slow
Just take it slow, just take it slow, oh oh oh ohh
Just take it slow, just take it slow, just take it slow, oh oh
oh ohh, slow

Just stay right next to me, I'm loving all them nights we never
fight
I know I did you wrong sometimes, I'm trying to make it right
Girl yeah alright ain't no stopping at the light
Chase you instead, 'cause girl I need you in my life

And I know it, we might be different all along
Keep you close, love when you with me, you keep me strong
And I love, love when we kiss and love when you moan
Next to me, let's switch position, just take it slow
Just take it slow, just take it slow, oh oh oh ohh
Just take it slow, just take it slow, just take it slow, oh oh
oh ohh, slow
