

Out There

Luka Bloom

Did you know I was out there?
I knew you were out there
Did you know I was out there?
I knew you were out there

I saw you in a dream
I saw you like a summer's evening
Did you know I was out there?
I knew you were out there
On your own
You never know who's out there
You never know who's out there

Did you know I was out there?
I knew you were out there
Did you know I was out there?
I knew you were out there

I saw you there upon the sand
I saw the flat stone leave your hand
You were all alone there
You never know who's out there
You never know who's out there

You never be alone
You need never be alone
Did you know I was out there?
I knew you were out there
You never know who's out there
You never know who's out there...
