

# Waves

Luke Bryan

It's like the sun went down just to frame your face  
Like they played that song just to see you sway  
Like that old surf shop had you in mind  
With what you got on, making those tan lines

It's like the ocean knows we're laying  
On this beach tonight  
It's like the sand's been waiting  
For you to come alive 'cause

You were made for summer  
Just like these stars we're under  
We're made for lighting this July sky up  
Blanket down made for me and you tied up  
All night long, over and over  
Crash into me and pull me closer  
Kiss by kiss, one after another  
Don't let go, baby, let this summer  
Just keep on coming in waves  
Keep coming in waves  
Keep on coming in waves  
Keep coming in waves

Wish I could bottle up the taste on your lips  
That margarita saltwater sunburned sip  
It's like I feel that sun right next to me  
Yeah, girl, your touch is a hundred degrees

Boardwalks were made for dancing  
And flip flops were made to lose like  
This night was meant to happen  
And, girl, I was made for you like

You were made for summer  
Just like these stars we're under  
We're made for lighting this July sky up  
Blanket down made for me and you tied up  
All night long, over and over  
Crash into me and pull me closer  
Kiss by kiss, one after another  
Don't let go, baby, let this summer  
Just keep on coming in waves  
Keep coming in waves  
Keep on coming in waves

Keep on coming in waves  
Keep coming in waves  
Keep on coming in waves  
Keep coming in waves

Baby, you were made for summer  
Just like these stars we're under  
We're made for lighting this July sky up  
Blanket down made for me and you tied up  
All night long, over and over  
Crash into me and pull me closer  
Kiss by kiss, one after another

Don't let go, baby, let this summer  
Just keep on coming in waves  
Keep coming in waves  
Keep on coming in waves  
Keep coming in waves
