

# CUMULUS NIMBUS

Luke Christopher

Virtue's out of town until the weekend  
My kindness took a business trip to Maine  
The only one that's home is awkward feelings  
So I'ma throw a party for the pain

When I'm up, I'm fucking up, cumulus nimbus  
When I'm down, I'm fucking down, I'm subterranean  
You took my hand and told me life is for the living  
Just take a stand and learn to dance inside the rain  
Dance inside the rain

Blue waters, blue waters  
These blue waters  
But they can't blame me, they all do the same thing

My happiness has had another baby (Goodbye my love)  
Packed its bags, and it's traveling the globe (Hope your trip goes well)  
But my sense of self is looking at me crazy (Who you lookin' at?)  
Saying "do you really plan to let him go?" (And when will you come back?)

Now I'm the [?]

Why I always gotta be the one to hold you down in stormy weather  
Like to think you know me better

See I done told you from the dot that I ain't perfect

I'm drowning in the deep, so I'm just surfin' on the surface

And you can call it hurtin', but I know that it's more complicated

Would you ever tell me if you if you got too tired of waiting patiently

I get it now, you probably just don't know what you would say to me

Lately, I been hatin' me, you just don't feel safe with me, do you?

I go through changes like voodoo

You see the storm in my head, I see the pain comin' through you

When I'm alone in the bed, think to myself "what would you do?"

But I know how this ends, and I ain't trying to lose you

I just close my eyes and I go, somewhere where I can be alone, I-

'Cause when I'm up, I'm fucking up, cumulus nimbus

When I'm down, I'm fucking down, I'm subterranean

You took my hand and told me life is for the living

Just take a stand and learn to dance inside the rain

So dance inside the rain

Blue waters (Maybe you just got problems)

(Maybe you just got problems, problems)

Blue waters (Maybe you just got problems)

(Maybe you just got problems, problems)

These blue waters

But they can't blame me, they all do the same thing
