

How Far

Luke Christopher

Yeah, I know you crave it like romance
And I know you feel it like a slow dance
Never going fifty, I'm a four man
Plus I know it breeze like the soul, man
Getting you to follow like I'm towin'
Music be the torch that I'm holdin'
And I got to be the leader cause I know, man
Your heart stops beating when it's cold, man

No man can be the savior
Man'll keep tabs when he saves ya
If you do him justice, then he might pay ya
Only the immortal have a chance to make a change up
Just like a god, cast 'em on a rock
Then let 'em climb up Mt. Olympus to the top
Never will he stop cause he don't wanna feel us bring down fire
s who saying, "Why didn't you tell us the end?"
But the after story goes on and on, though
But I don't wanna tell where the hell this [?] go
Cause that'll do damage to your ears
Darkness turn savage through your fears
On with the years
Now you up in high school
It's always about the gods and goddesses ain't cool no more
And I can barely tell you've been to school before
Rappers acting like they foreign, I can't take it no more

I don't have a clue how far to go until I've shown
That I got some questions, that you've got some answers
You fuck up the first time, there's no second chances
I got some questions, that you've got some answers
Fuck up the first time, there's no second chances, hey
