

MAKE YOU FORGET

Luke Christopher

Are those marks on your skin?
Still reminds me of where you've been
If you're going out or staying in
Either way I, I want in
You're the closest thing that happened
That I ever knew
Baby, I don't want no lovers
I got it with you

You said, "What?" too many times
So proud of when it hurt you
Take your time when meeting somebody new
I never judge you, I wanna love you right oh

I can't make your past go away
But I'll make you forget it
(I can't make your past go away but I'll make you forget)
I can't make your past go away
But I'll make you forget it
(I can't make your past go away but I'll make you forget)

Right when we met
It was like a reflex
I could be a shy guy
Suicide on my mind
I've been thinking about how I've changed
Ever since I saw your face
Just somebody who wanna mess you up
But he's lucky I'll miss you later
You've been quicker then we are used to
I see right through you
Your eyes in the dark like lights
Bright my life, and I hope I do you
And I hope this voodoo
The way that I move you
Like you move me
Come on too, I'll be your groupie, I swear

You said, "What?" too many times
So proud of when it hurt you
Take your time when meeting somebody new
I never judge you, I wanna love you right oh

I can't make your past go away
But I'll make you forget it
I can't make your past go away
But I'll make you forget it
