

## USED TO LOVE

Luke Christopher

(Yeah) You're not the one I used to love  
She's still there inside you  
Something happened to your heart  
You should've seen yourself in high school  
You're not the one I used to love  
What makes you wanna hide you?  
I wish we never grew apart  
She don't know how much I liked you

I might still be the guy for you  
Talk to you, never lie to you  
When times are getting low for you  
Always pick up the phone for you  
I don't wanna talk knowledge  
I ain't your therapist  
You know that I can't be silent  
Girl, 'cause I care a bit, oh

You're not the one I used to love  
She's still there inside you  
Something happened to your heart  
You should've seen yourself in high school  
You're not the one I used to love  
What makes you wanna hide you?  
I wish we never grew apart  
She don't know how much I liked you

I might still be the guy for you  
Talk to me, I could fight for you  
The shawty that I knew was all that  
Stand up and get your heart back  
Your friends put you on the wrong path  
I know you ain't really like that  
Used to be my everything  
Crazy man, that nothing's changed, yeah

Are you the one I used to love?  
She's still there inside you  
Something happened to your heart  
You should've seen yourself in high school  
You're not the one I used to love  
What makes you wanna hide you?  
I wish we never grew apart  
She don't know how much I liked you
