

How Sick Is This

Lumidee

How sick is this
How sick is this

I stepped up my game is true
Life rearrange it, I'll change for you
Life rearrange it, I'll change for you

It's just that complicated should I wait foreva
Grew up hearing stories on how it could be betta
Watchin hustlers on the block makin that chedda
Ask them will they stop and they tell me neva
Wanna make it to the top then you keep it going
Wanna show them that your hot betta keep flowin
I was chillin on the stoop jus a girl from the hood
Always had a dream I thought it was all good

And sometimes I wonder should I need you
So hard to reach you
Love is so strong I can never deceive you
Never deceive you
Never deceive
Love is so strong I can never deceive you

How sick is this
How sick is this

Listen up I gotta story to tell
But believe you aint gonna hear it till I get heavy mail
Even then you aint gonna hear it
You gonna see it on the big screen
Yes I got big dreams
So im doin big things
I aim for the top
That's the only thing that breaks me
That drop hang back god damn this chick is sickin
This industry is cold oh yes this shit is blisting
But this music controls me it's so addicting

And sometimes I wonder should I need you
So hard to reach you
Love is so strong I can never deceive you
Never deceive you
Never deceive
Love is so strong I can never deceive you

How sick is this
How sick is this

I stepped up my game is true
Life rearrange it, I'll change for you
Life rearrange it, I'll change for you
Life rearrange it, I'll change for you
