

# burn the world with me

LUNA KILLS

(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)

It is my favorite scene  
Forever tied in this fantasy  
Loving like a God, do you feel me  
No mercy, no empathy  
On our knees like we're ready to be put down  
There's no end-of-the-world to be chased now  
Would you follow me down  
If I dive down down, If I dive down down

Burn the world with me, burn the world with me

Come take a dive with me (It corrupts us within)  
Come burn the world, burn it down with me

(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)

I see you looking at me  
Wearing glass skin like a weird daydream  
Sucked in a void all my feelings  
Melting in your gravity  
But you see, you got this habit  
Seeing something that ain't yours, you gotta have it  
I arrive on time just to pick my battles

(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)

Come take a dive with me (It corrupts us within)  
Come burn the world, burn it down with me

Floating through this silent denial  
Even the light bends for you  
The darkest night will fall to the ground  
And swears to serve your truth  
And when It's nothing but dust to dust  
When the sun devours our skies  
It'll be the chrome in your eyes  
That will take your life

(Burn it down)  
(Burn it down)

Come take a dive with me (It corrupts us within)  
Come burn the world, burn it down with me  
Burn the world with me

(Burn the world with me)

(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)  
Burn the world with me  
(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)  
(Burn the world with me)
