

fever dream

LUNA KILLS

It calls by my name through the dark
Holds me down softly until I'm gone
Poisons my mind with it's song
And I cradle it like my true love
It cuts through my skin like a knife
Bleeding me out, I can't hide
Crawling away from the light
I have seen your dark paradise

Your light unholy, shine it down on me
Yeah you make me feel like a fever dream
With you I'm lonely, It's how It's meant to be
Yeah you make me feel like a fever dream

Like a fever dream
Like a fever dream

Tearing down walls that we built
Allowing the darkness to seep in
Trapped in fever dream

Your light unholy, shine it down on me
Yeah you make me feel like a fever dream
With you I'm lonely, It's how It's meant to be
Yeah you make me feel like a fever dream

Like a fever dream
Like a fever dream

It calls by my name through the dark
(Poisons my mind with its song)
Holds me down softly until I'm gone
(Cuts through my skin like a knife)

Like a fever dream
Like a fever dream

Your light unholy, shine it down on me
