I'm living that life, and I don't care about it  
Acting real hard like you killing, I doubt it  
You steady hating on me when I'm behind the scenes  
And you really think Ima' allow it

You're just a maggot, I'll stomp til you're dead  
Far from a savage, it's all in your head  
I'm with a bad bitch right now in L.A we touched down  
So, I'll let my gang handle instead

Sit and you plot like I'm destined to fail  
All of my music like the Holy Grail  
I know it's pissing you off so I'm never gon' stop  
I'll just keep going hard, I will always prevail

I know deep down that you wanna be me  
Try and you try but you never gon' see  
I am the only one you cannot be  
You think you got it but I disagree, yea  
(Yea)

You tellin' your friends that we used to be tight  
Taking credit when you never said it  
Then you lie on my name and it's all out of spite

I blew up because I kept on working  
When you sat in your basement just wasting your time  
I blew up and then you started lying  
Trying to take what's not yours so you got left behind

I can see through all the Bullshit  
Made me wanna get a full clip  
Point it at me then I let it go all the way  
Into my brain and unload It

I can see through all the Bullshit  
Made me wanna get a full clip  
Point it at me then I let it go all the way  
Into my brain and unload It
