

Alive

LUNAFLY

Seeping coffee
Looking out into the open blue
I'm dreaming of me and you
Trying to fight it
But you keep on running
through my head night and day oh yeah
Drinking to get tipsy
And freedom like a gipsy
We're living up until the sun goes down
I can take you higher
Burning like a fire tonight

From your head to toe
You look perfect soul
when you come puring down on me
Baby just one kiss
We'll be pleased
You make me wanna fly
And even be a better guy
Trying just to know you
Baby let me hold you now
I'll show you love is simple thing
Don't you know I'm trying?
You're the reason I survive
Because of you I feel alive

Dirty dancing
Wanna feel the rythm of your love
A perfect map above
We're mighty
We could be together
Here forever 'til the end of time

Girl my heart is racing
Don't make me do the chasing
You know I'll never ever let you down down
No I can take you higher
Burning like a fire tonight

From your head to toe
You look perfect soul
when you come

From your head to toe
You look perfect soul
when you come puring down on me
Baby just one kiss
We'll be pleased
You make me wanna fly
And even be a better guy
Trying just to know you
Baby let me hold you now
I'll show you love is simple thing
Don't you know I'm trying?
You're the reason I survive
Because of you I feel alive

Don't you hear the
knocking on your door?
Oh baby I'm not like the one before
I just wanna make
You feel alive

From your head to toe
You look perfect soul
when you come pouring down on me
Baby just one kiss
We'll be pleased
You make me wanna fly
And even be a better guy
Trying just to know you
Baby let me hold you now
I'll show you love is simple thing
Don't you know I'm trying?
You're the reason I survive
Because of you I feel alive

Because of you I feel alive
Because of you I feel alive
Because of you I feel alive
