

Just Want You to Know

LUNAFLY

Just another day, just another night
Seeing everything black and white
Till I'll see you there
Standing out in the crowd

Is it paradise or reality
Never wanted normality
And I stuck still
Drive but I go nowhere

I like the way that you move closer to me
Baby, I guarantee

I'll follow you, if you want me to
Tell me, I'm staying in the night
Everything about you, or the things you do
Making me feel alive

I'll be loving you, if you need me to
Look at the stars in the sky
Maybe destiny let you right here to me
I'll never let you go
I just want you to know

Wanna know your name
Shouldn't played the game
Girl, I'm going out of my mind
Don't you realise? You make me feel brand new

Going all the way, we can get away
Just the two of us in the dark
Won't you tell me now?
Tell me a place in far

I like the way that you move closer to me
Baby, I guarantee

I'll follow you, if you want me to
Tell me, I'm staying in the night
Everything about you, or the things you do
Making me feel alive

I'll be loving you, if you need me to
Look at the stars in the sky
Maybe destiny let you right here to me
I'll never let you go
I just want you to know
