

# We Go Back

Luscious Jackson

We grew up together  
Lightened up together

Running down dark streets deep in the past  
We never asked will it last  
From young one to final flow  
Can't fake what we know

We go back but we can't go back  
But we can go on

We go back and we'll always have what we had

Great heights scaled and mountains made bright as fire  
Brother always  
I saw you see it all  
I saw you walking your own way  
From first show to final flow  
Can't take what we know

We go back but we can't go back  
But we can go on

We go back and we'll always have what we had

We go back and we'll always have what we had

Still feels like you're near  
Still feels like you're here
