

WE'LL BE TOGETHER

Lute

I've been waiting for a minute just to be alone
Just to find out how to fix a fucking broken home
I can see it working if I tried

Any time now you will get it and you'll understand
That I'm holding something close and have a better hand
Dealt my cards in the motherland

And I'll dream and I'll dream that you think of me
I know I'm the one you can't oversee
All the late nights fights and the jealousy
Said you're done but I know you'll come back for me

Oh, you know that I love you
And that bitch can't do it like I do
Together, together forever
I know you can't see straight but we're better together

Blacker the berry, sweeter the juice
I'm just out here tryna live out my truth
When I do the math I carry the two's
Subtract all the bullshit it's just me and you

I had my easy you know how I do
I know you with it, you know I need proof
Don't play them games, you know I don't choose
If you ain't a rider then chuck up the deuce

I ain't a player but shit I ain't buying
But you bet the type to be stuck on my mind
I know I'm the type to be wasting your time
But who you know doing you better than me

You say I'm no good but who do you keep?
But you know our chemistry run a lil deep
Say we together forever, forever, fuck it forever we be

And I'll dream and I'll dream that you think of me
I know I'm the one you can't oversee
All the late nights fights and the jealousy
Said you're done but I know you'll come back for me

Oh you know that I love you
And that bitch can't do it like I do
Together, together forever
I know you can't see straight but we're better together

And I'll dream and I'll dream that you think of me
I know I'm the one you can't oversee
All the late nights fights and the jealousy
Said you're done but I know you'll come back for me

Oh you know that I love you
And that bitch can't do it like I do
Together, together forever
I know you can't see straight but we're better together

I know you can't see straight but we're better together
