

Fall Into The Night

LVNDSCAPE

Da-da-da-da-dam
Running away with our madness
Drinking a ballon of sadness
Setting our problems on fire
Dancing around with desire
Ooh, ooh

Better fly souls
Living the criminal
Watch your heart's gone in the darkness
It's out of our control
No matter where we go
Whenever it's love you, oh finally is

All my love
Side by side
We don't have to try
Fall into the night
All my love
Side by side
We don't have to try
Fall into the night

Fall into the night
Into the night
Into the night
Fall into the night
Into the night
Into the night

Open your eyes and you'll see me
Open the sky like dvd
O-oh-o-oh
Rapture us around like a madness
Young and wild and we're wreckless

Better fly souls
Living the criminal
Watch your heart's gone in the darkness
It's out of our control
No matter where we go
Whenever it's love you, oh finally is

All my love
Side by side
We don't have to try
Fall into the night
All my love
Side by side
We don't have to try
Fall into the night

Fall into the night
Into the night
Into the night
Fall into the night
Into the night

Into the night

All my love
Side by side
We don't have to try
Fall into the night
All my love
Side by side
We don't have to try
Fall into the night

Fall into the night
Into the night
Into the night
Fall into the night
Into the night
Into the night

All my love
Side by side
We don't have to try
Fall into the night
All my love
Side by side
We don't have to try
Fall into the night
