

Way Out

Lydia

Yeah, always talking about
How you missing out or where you'd rather be
See you hiding out
You can cover up love it's cool with me

'Cause I've been sleeping in your bed
Buried in the daylight
I feel you on my skin in the summer rain
Only hear you in my head
Speakin' different language every single word
They sound the same

I won't hold on
If you need a way
If you need a way out
You stayed too long
If you need a way
If you need a way out

If you need a way
If you need a way out
If you need a way
If you need a way out

Yeah, I've been wonderin'
Why you runnin' round like the sirens going off
Don't understand it
Go and find what you love, I hope it's enough

'Cause I've been sleeping in your bed
Buried in the daylight
I feel you on my skin in the summer rain
Only hear you in my head

Speakin' different language every single word
They sound the same

I won't hold on
If you need a way
If you need a way out
You stayed too long
If you need a way
If you need a way out

If you need a way
If you need a way out
If you need a way

'Cause I've been sleeping in your bed
Buried in the daylight
I feel you on my skin in the summer rain
Only hear you in my head
Speakin' different language every single word
They sound the same

Yeah, I won't hold on
If you need a way out

You stayed too long
You need a way out

I won't hold on
If you need a way
If you need a way out
You stayed too long
If you need a way
If you need a way out

If you need a way
If you need a way out
If you need a way
If you need a way out
