

I Might Like It

Lyrica Anderson

It's not that I don't wanna let you
It's just I don't wanna let you and then
Then you up and forget me

It's five in the morning, tell me why you calling
I hope you ain't horny
Baby, it's looking all familiar and I like it
Tell me why am I laying here all excited, haha
Cause I like it

Goose, yeah I'm on it, robe on my body
Candles lit up before I knew he was coming, yeah
Oh what a feeling
I got to admit, I may do something that I'll regret
Too late to take it all back
Take it all back, cause you sent a text right back
Telling me you on your way and you really ain't that far

It look good, yeah I know it, don't it?
You saw how, all the boys be all up on it
I'm not the type to be caught up in the moment
Let you hit it from the back just to say you had that
Cause I'm so scared, that I might like it
Yeah, I'm too scared that I might like it

He tells me, he's only here to party for the weekend
So in my mind I don't want it
But my body wanna jump up on it, down
This is serious, ooh you got me curious
You're tone is so appealing and I really need some healing
Got me going through the motions
Now I'm higher than the ceiling, ah
I'm fucking higher than a ceiling now, ooh

Goose, yeah I'm on it, robe on my body
Candles lit up before I knew he was coming, yeah
Oh what a feeling
I got to admit, I may do something that I'll regret
Too late to take it all back
Take it all back, cause you sent a text right back
Telling me you on your way and you really ain't that far

It look good, yeah I know it, don't it?
You saw how, all the boys be all up on it
I'm not the type to be caught up in the moment
Let you hit it from the back just to say you had that
Cause I'm so scared, that I might like it
Yeah, I'm too scared that I might like it
It look good, yeah I know it, don't it?
You saw how, all the boys be all up on it
I'm not the type to be caught up in the moment
Let you hit it from the back just to say you had that
Cause I'm so scared, that I might like it
Yeah, I'm too scared that I might like it
