

On The Movie Screen

Mélée

It all began with the roundabout
We're leaving from the theatre
The credits fade on sweeter days
You're off again
And you're filled with doubt
Another ruined evening
Your fantasies keep leading you away, away, away, away
They're leading you away

Now here you are still living for the kiss
The kiss you think you need
Whispered words still tremble on your lips
It's more than you have seen
On the movie screen
On the movie screen

You dress me up in the love you see
It's orchestrated beauty
Synthetic and alluring
Look, I know it's tough
We may disagree
But there's simple in the magic
I'll never lead you tragically away, away, away, away
I'll never lead you away

Now here you are still living for the kiss
The kiss you think you need
Whispered words still tremble on your lips
It's more than you have seen
On the movie screen
On the movie screen

Love's not always picture perfect
We fight, we cry, we learn it's worth it
Love's a supernatural fire that burns

Now here you are still living for the kiss
The kiss you think you need

Now here you are still living for the kiss
The kiss you think you need
Whispered words still tremble on your lips
It's more than you have seen
On the movie screen
On the movie screen
On the movie screen
On the movie screen
