

Hold us in your arms  
We're not feeling much  
The provenance of the call  
Is where I want to be

'Cause when you hold us  
It's electric  
And when you lead us

Take us on a ride  
I'll take you on a voyage through the night sky  
Before we lose control  
And it's OK to lose control it's time to fly  
The distance of the soul  
Well there's no distance, in the soul you are a limitless star  
Is where I want to be  
You're wrapped up tight with me

'Cause when you hold us  
It's electric  
And when you lead us

We look deep into the heavens  
We are the planet makers

I am the mother of all  
Over every galaxy  
There is no one but me  
I am the mother of all  
Immortal energy  
Faceless wonder

I am the mother of all  
Over every galaxy  
There is no one but me  
I am the mother of all  
Immortal energy  
Faceless wonder
