

## My world

Mabel

It's out of my sight it could have been longer  
Over my life you know the way you loved me  
You come to my mind the reasons she got me thru'  
It could have been right you ruled those flights above me

I see the world  
I see the world inside me now  
I see the world, I see you in my world  
And now beside me

Away from my life it could have been stronger  
Long for the nights we should have made them better  
Feelings of pride  
Work out just as they do  
Get over it right  
You know the way I loved you

I see the world  
I see the world inside me now  
I see the world, I see you in my world  
And now beside me

I see the world  
I see the world inside me now  
I see the world, I see you in my world  
And now beside me  
And now beside me  
And now beside me
