

Better

Mac Ayres

No more parkin' on 25th, I got a spliff and a life to live
Can I talk about it?
Next checkpoint where my head could lay, I gotta say what I could not
say
Can I talk about it?

You shoulda known me better, go save your trust
I keep my mouth shut maybe I'll open up
I see you shinin' baby, golden aura
I keep my mouth shut, maybe I'll open up

So can I one time
So can I one time
So can I one time
Said I don't need much tryna get this started for you, oh you

I just came to know you better
I just came to know you better, better
Baby, I just came to know you better
I just came to know you better, better

Tell 'em no more sneaking right out the back
I gotta face what the deck will stack but can I live, baby?
Oh, this time imma be waiting for tryna catch me the perfect storm
Let's talk about that
You shoulda known me better, go save your own
You water nothing baby it never grows
I see the lining, baby, that silver glow
One day you're loving then you gotta hit the road

So can I one time
So can I one time
So can I one time
Said I don't need much tryna get this started for you oh you

I just came to know you better
I just came to know you better, better
Baby, I just came to know you better
I just came to know you better, better

I just came to know you better
I just came to know you better
I just came to know you better, better, better

I just came to know you better
I just came to know you better, better
Baby, I just came to know you better
I just came to know you better, better
