

she won't stay long

Mac Ayres

I could love you in a different place
Keep you cool right underneath this shade
Never thought that it would feel this way
When I'm thinking about you (When I'm thinking about you)
I don't need another saving grace
I don't need another peace and place
Never thought that it would feel this way
Guess I already knew (Knew)

If I know something, but, baby, you're broken
Don't you come and tell me, baby, just show me
If I know something, baby, I'm just falling in love

She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
But I've been waiting for the longest
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
But I've been waiting for the longest

She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
But I've been waiting for the longest
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
But I've been waiting for the longest

She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
But I've been waiting for the longest
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
She won't stay long (She won't stay long)
But I've been waiting for the longest
