

Be With Me

Mac McAnally

Love is a geometric inconsistency
I never trusted it as far as it was throwing me
We've got no reason to believe that we can make it
We know the risk, it's inexcusable to take it

But if you need me, be with me, be with me all the time
If you believe me, be with me, be with me heart and mind
And if it's stormy, be with me until the storm is through
If you will only be with me, I will be here for you

Some people think every move they make is destiny
They simply, want it harder than it has to be
I know it complicates the situation
To wanna know what's past infatuation

But if you need me, be with me, be with me all the time
If you believe me, be with me, be with me heart and mind
And if it's stormy, be with me until the storm is through
If you will only be with me, I will be here for you

Got no precedent, shred of evidence, got no reason to

But girl, if you need me, be with me, be with me all the time
If you believe me, be with me, be with me heart and mind
And if it's stormy, be with me until the storm is through
If you will only be with me, I will be here for you

Girl, if you need me, be with me, be with me all the time
And if you believe, be with me, be with me heart and mind
And if it's stormy, be with me until the storm is through
If you will only be with me, I will be here for you
