

Remote Control

Mac McAnally

Here we go

You got a horizontal hold on me
And you got the only signal I receive
And every time I'm close to you
You got emotions that you put me through

Remote control
My name is on a button
I'm just a button on your remote control
My name is on a button
I'm just a button on your remote control
Your remote control

You know that a man can only take so much
And you can move me with a single touch
And if enough picture starts to fade
All you got to do is point that thing, just wave

Remote control
My name is on a button
I'm just a button on your remote control
My name is on a button
I'm just a button on your remote control
Your remote control

Willy
Myself

You can turn me up
Please don't turn me up
Making me rattle and roll in any old thing that you want to
Just as long as you stay around
I can't see how you do what you do to me
I think it must be remote controlled

Remote control
My name is on a button
I'm just a button on your remote control
My name is on a button
I'm just a button on your remote control
Just a little button on your remote control

My name is on a button
I'm just a button on your remote control
My name is on a button
I'm just a button on your remote control
Just a little button on your remote control

Remote control
