

Two Worlds

Amy Macdonald

When two worlds collide
I'm happy that I'm by your side
Cause we will be forever
You and me

When dark falls everywhere
And life has gone to deep despair
I'm happy that I spent it all
With you

I think about you every night
You'll never go away
I dream about the day we met
Like it was yesterday

I know I'll see your face
One more time before I die
So we can say
Goodbye

When heaven called you from above
They took the only one I love
But we'll still be forever
You and me

When life has left you all alone
And love has quickly come and gone
Well we'll still be forever
You and me

I think about you every night
You'll never go away
I dream about the day we met
Like it was yesterday

I know I'll see your face
One more time before I die
So we can say
Goodbye

When two worlds collide
I'm happy that I'm by your side
Cause we'll still be forever
You and me
