

One Too

MacKenzie Porter

You were the one to change everything
You were the home I knew I could run to
And I never thought about a ring
But you made me want to
How could I have been so wrong?
Never thought you'd be the one to
Break up what we set in stone

I didn't plan on learning how to live without you
I thought I found my settle down the night I found you
We used to talk about forever, now look at what it's come to
I didn't just love you, I really thought you were the one too

Ain't that a dumb truth
I never thought we'd fall apart
And I'd be the one who
Was left with the hurt
A whole lot of work just tryna undo
Something that felt so real
Now I gotta be the one to
Move on no matter how I feel, yeah

I didn't plan on learning how to live without you
I thought I found my settle down the night I found you
We used to talk about forever, now look at what it's come to
I didn't just love you, I really thought you were the one too

I really thought you were the one to
To play that part, to go that far, to wake up next to
So how am I supposed to try and just forget you
You broke my heart, the hardest part is I can't even blame you
You just didn't feel the same too

I didn't plan on learning how to live without you
I thought I found my settle down the night I found you
We used to talk about forever, now look at what it's come to
No, I didn't just love you, I really thought you were the one t
oo
I really thought you were the one too
