

# Hide Out

Macseal

I tried feeling elated  
Nothing satisfies  
The world's so complicated  
Without you by my side

I know it's hard to see  
When you're away from me  
I know you make believe now

Slow down  
You wanted to hide out in my head  
But you were already there

So I'll drop the barricade and  
Open up the blinds  
I'll keep it decorated  
Without you by my side

Slow down  
You wanted to hide out in my head  
But you were already there  
Slow down  
You wanted to hide out in my head  
But you were already there

Scarred in a gown  
Freaking you out  
Land in the morning just to  
Take it lying down

Slow down  
You wanted to hide out in my head  
But you were already there  
Oh, you know now  
You wanted to hide out in my head  
But you were already there
