

Where Nobody's Gone Before

Madcon

I wanna go where nobody's gone before
Yes, I wanna go where nobody's gone before
I wanna explode in your body, we came here naughty
I know you want it, want it
Yes, I wanna go where nobody's gone before
Gone before

Yeah, where nobody has never gone
First time on the moon yelling mayday
Got a feeling we're at match, but you'll never know
Better know it's all cause you call me baby
And I'm loving how you ride with me
Riding when we ride 'til the sun is up, we alive
A first time for everything
Baby girl I wanna be the first that has ever been
We be rocking, rocking all night
You and I we about to get tight
Ain't no stopping, watch me take flight
And tonight we doing it right

I wanna go where nobody's gone before
Yes, I wanna go where nobody's gone before
I wanna explode in your body, we came here naughty
I know you want it, want it
Yes, I wanna go where nobody's gone before
Gone before

Yeah, he's trying to be my everything
Furry money, furry rings, give me everything
And so heavy when he weigh her
Make a dude look up from his papers
than anything
In the air where our hearts start merging
Real fly, real uptown I'm intergalactic burning
Rocking, rocking all night
You and I we about to get tight
Ain't no stopping, watch me take flight
And tonight we doing it right

I wanna go where nobody's gone before
Yes, I wanna go where nobody's gone before
I wanna explode in your body, we came here naughty
I know you want it, want it
Yes, I wanna go where nobody's gone before
Gone before

I wanna breathe you out, I wanna know your debt
And when I left my ship, let's call it one slow step
I want to be the first, want to explore your turf
I wanna go where nobody's gone before
I wanna go, I wanna go
