

Only Gets Better

Maddi Jane

Life has so many ways of letting us down
Inside the potion keep your feet on solid ground
Your heart filled with doubt, you're crying out
And you just can't seem to turn this thing around

There is hope when you can't grow
You're not alone, just smile let go

When you start feeling life's at an all-time low
When you're fresh out of cash and the moneys low
Dreams running out and your heart gets broke
It can only get better

When the walls pull in and you just don't know
which way you gonna turn the way you gonna go
The heat turns off and the world gets cold
It can only get better
It can only get better

I know we make mistakes and think it's too late
To take a stand and find our courage once again
Thought some they say, they don't share your faith
Or believe in what it is you feel with them

There is hope when you can't grow
You're not alone, just smile let go

When you start feeling life's at an all-time low
When you're fresh out of cash and the moneys low
Dreams running out and your heart gets broke
It can only get better

When the walls pull in and you just don't know
which way you gonna turn the way you gonna go
The heat turns off and the world gets cold
It can only get better
It can only get better

I know what you're feeling
Life's about give and take
Try your best to keep calm
And have a little faith

When you start feeling life's at an all-time low
When you're fresh out of cash and the moneys low
Dreams running out and your heart gets broke
It can only get better

When the walls pull in and you just don't know
which way you gonna turn the way you gonna go
The heat turns off and the world gets cold

It can only get better
ooh la da da da da
yeah yeah
It can only get better
ooh hooo yeah hmmm

It can only get better
