

## Faces

Madi Diaz

All the girls and boys are dancing hand in hand  
Another night romanced away  
They shimmer neath the party lights  
No they don't sleep at all the spend the night  
They celebrate

All the faces that I know  
All the glitter and the gold washes away, washes away  
Until all that's left is blue  
Until all I see is you walking away, walking away

The city after dark is ringing like a silver bell  
It knows my name, it calls to me  
The bars are closing down  
The crowds are casting out reflections in the rain  
The empty streets

All the faces that I know  
All the glitter and the gold washes away, washes away  
Until all that's left is blue  
Until all I see is you walking away, walking away

I lost my heart before I found it  
I didn't know how I felt about it  
I didn't know how I felt about it

All the faces that I know  
All the glitter and the gold washes away, washes away  
Until all that's left is blue  
Until all I see is you walking away, walking away
