

Look Right Through It

Madi Diaz

Everybody wants to know
When i'm in my head am i alone
Pulling me out to hold me hostage
Won't let me go

Hiding back behind my breath
Is it in my heart or in my head
Calling me out the footsteps falling through it

I'm in my room when it's still dark
And all the things that seem so far
They all fall backwards into focus
Do you see it through

Do you see it, see it
Look right through it
Look right through it
Do you see it, see it
Look right through it
Look right through it
