

Petals

Madilyn Bailey

Roses, Lilies, Daffodils
Kill them till you get your fill
You're so indecisive
Yeah, you don't know what your type is

Supermarket or the mall
Why have one? You can have them all
A genie in a bottle or a size 2 super model

Yeah, you give me whiplash
Kicking me out
Then calling me crying, you're wanting me back
Say it's in the past, you're a better man
Said this will be different, but this isn't that

Screaming in my head, death metal
Rip my heart right down the middle
Yeah, you're picking me apart like petals
He love me, he love me not
Yeah, he love me, he love me not

Thought that what we had was special
Guess I should have known you'd let go
But you're picking me apart like petals
He love me, he love me not
Yeah he love me, he love me not

A bouquet with variety
But today all you want is me
You've never felt this way at least
You don't think you have this week
Apples, oranges, strawberries
A buffet all that you can eat
But look how fast you forgot
With coconuts on your dad's yacht

Screaming in my head, death metal
Rip my heart right down the middle
Yeah, you're picking me apart like petals
He love me, he love me not
Yeah, he love me, he love me not

Thought that what we had was special
Guess I should have known you'd let go
But you're picking me apart like petals
He love me, he love me not
Yeah he love me, he love me not

I don't know how it happened
We're falling again
Crashing and burning
And wishing I had not let you back in
What was I thinking?
It's like cupid and karma were conspiring

Screaming in my head, death metal
Rip my heart right down the middle

Yeah, you're picking me apart like petals
He love me, he love me not
Yeah he love me, he love me not

Thought that what we had was special
Guess I should have known you'd let go
But you're picking me apart like petals
He love me, he love me not
Yeah he love me, he love me not

(He love me, he love me
He love me, he love me
He love me, he love me
He love me, he love me...)

He love me, he love me not
Yeah he love me, he love me not
