

Round We Go

Madness

Round and round we go
Round we go again
Round and round we go
Round we go again

Red cheeks and a pair of wings
Is this what mother gave him
He'll hear the angels sing
On high for all to praise him

Gods gift and no one wants to know him
She'll sing a lullaby and life will show him

The sun comes up and sun goes down
The wheels come off and the deals go down
The news comes out and the star is found
We play the game and go round and round

White teeth and a knowing smile
You'll hear no words of wisdom
Her son is in denial
She hopes the world forgives him

Gods gift and no one wants to know him
She'll sing a lullaby and life will show him

The sun comes up and sun goes down
The wheels come off and the deals go down
The news comes out and the star is found
We play the game and go round and round

Round and round we go
Round we go again
Round and round we go
Round we go again

Her son her little boy
Too sly too cruel to mention
Well crafted lies deployed
He won't accept redemption

Gods gift and no one wants to know him
She'll sing a lullaby and life will show him

The sun comes up and sun goes down
The wheels come off and the deals go down
The news comes out and the star is found
We play the game and go round and round

Round and round we go
Round we go again
Round and round we go
Round we go again
